# EVA POWDER

EVA SOLES

Vapesol, committed to an ecologically responsible approach, has achieved an ambitious goal of 100% reuse and zero waste in the production of EVA soles. This means not only recycling deformed soles, but also redesigning processes to completely eliminate unnecessary waste.

The convergence of technology and sustainability is shaping the future of the sole industry. By adopting practices that transform deformed soles into valuable resources and eliminate waste, Vapesol is leading the start of a revolution that not only redefines the production of EVA soles, but also contributes to a more sustainable and innovative world.

**Vapesol is the 1st company in the world with zero waste in the injection of EVA soles.**

SHAPING THE FUTURE  
OF THE SOLE INDUSTRY.
